

Software Working Student

all genders, 15–20h/week

IRUBIS

IRUBIS is a young, growing biotechnology startup specialized in monitoring and control of bioprocesses. Our technology accelerates the development of drugs. We are building a state-of-the-art system to provide our biopharma customers with information about their bioprocesses in the lab, in the office, at home and at any time. We process spectroscopic data to provide them with sophisticated data models. Apply to IRUBIS and be part of a great team that aims to revolutionize the way biopharmaceuticals are produced.

Your tasks

- minor frontend management
- visualization of spectroscopic data
- support of our software team in developing or debugging tasks
- fixing bugs in frontend/backend; everyone makes mistakes sometimes, so do we

Your profile

- good knowledge of Python (incl. object-oriented programming)
- nice-to-have: basic knowledge of JavaScript, Git and Linux
- you engage with code reviews and pair programming sessions
- proficient English language skills, German is a plus

What we offer

- flexible working hours, a great team and flat hierarchies
- modern office space: centrally located in Munich
- exciting personal development opportunities
- partly remote work is possible

Does all this sound interesting to you? Then send us your curriculum vitae without a personal photo in a PDF document to you@irubis.com
