

Software Team Lead

all genders, full time

IRUBIS

IRUBIS is a young, growing biotechnology start-up specialized in monitoring and control of bioprocesses. Our technology accelerates the development of drugs.

We are building a state-of-the-art system to provide our biopharma customers with information about their bioprocesses in the lab, in the office, at home and at any time. We process spectroscopic data to provide them with sophisticated data models. As the software team lead you will grow and guide our software team and work with external freelancers. Your initial goal is the design and implementation of a secure data pipeline that our customers trust.

Apply to IRUBIS and be part of a great team that aims to revolutionize the way biopharmaceuticals are produced.

Your tasks

- Leading the software team and responsible to guide, motivate and grow your people
- Being involved with fundamental software architecture decisions
- Coordinating and supervising the work of internal and external software developers
- Occasionally participating in software development tasks with the rest of the team

Your profile

- Experience as a software senior (4+ years)
- Experience in a leadership position in development and production stages (2+)
- Excellent knowledge of Python (e.g. Flask, REST API, Numpy)
- Good knowledge of JavaScript (React) and of Unix based Operating Systems
- Experience in agile software development and Git Version Control
- Proficient English language skills

What we offer

- Flexible working hours, a great team and flat hierarchies
- Modern office space: centrally located in Munich
- Exciting personal development opportunities
- Partly remote work is possible
- Employee stock option plan
